

Annual Review

for 2021

Making donkey welfare happen

www.donkeysanctuary.co.za

Welcome to our annual review

Purpose of this review

Eseltjiesrus prides itself on ethical operation and transparency. This review serves to inform you, the supporter of donkeys, about *what* we do, *why* we do it and *how* we do it.

We hope that you will find the information interesting and that you will join in our commitment to ensuring better lives for donkeys far and wide.

Our history and ethos

In 2001 Annemarie and I responded to a request from the local SPCA to provide shelter for two badly neglected donkeys. It became evident that there were many other donkeys similarly in desperate need of food, water, shelter and care.

The dream of a Donkey Sanctuary was born and after much planning the first donkey, Adam, arrived in 2007.

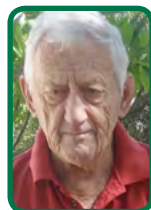

Here we now are, and thank you.

The past year has been difficult for many. The stoic manner in which donkeys face adversity is something we, who are blessed by knowing these gentle creatures, got to understand more fully.

I note, with gratitude, how cheerfully resilient our staff, our management and our Board were, together with our supporters who helped us during this past period.

Eseltjiesrus shows not only how resilient donkeys are - but also the amazing spirit South Africans - and all our supporters - have.

Stay safe and remember to care for donkeys and also each other.

Johan van Zijl
Dr Johan van Zijl
Chairperson, August 2021

COVER IMAGE

A series about donkeys was broadcast by the SABC RSG radio programme with Annemarie van Zijl as speaker. It raised national awareness about Eseltjiesrus and the plight of donkeys. Here our tribe is seen listening in.

Everyone pitched in to care for the donkeys during Covid hard lock down times. Here Eveline Hull who normally works in our Coffee Shop, helps to care for our donkeys.

Our vision and mission at Eseltjiesrus

Our vision is to promote the welfare and status of donkeys through a culture of caring. To achieve this vision Eseltjiesrus Donkey Sanctuary will:

1) Promote the welfare of all donkeys by:

- encouraging best practice in terms of the care and handling of donkeys
- engaging with donkey owners and professional animal carers to improve levels of care and eliminate abuse and maltreatment
- networking with organisations and individuals through the sharing of expertise and experience
- advocating and lobbying with relevant parties to implement good welfare practices and legislation and in the process strengthen our role as a legitimate stakeholder in donkey welfare.

2) Provide refuge and care for abused, neglected donkeys in the Western Cape through:

- maintaining the Sanctuary as a centre of excellence for donkey care

- ensuring that the Sanctuary is run in an ethical and impeccable manner
- identifying, encouraging and supporting a variety of initiatives (e.g. foster homes) that provide refuge and care for donkeys elsewhere.

3) Raise the status of donkeys so that they are recognized as the worthy creatures that they are through:

- educating the wider public through media, events, materials, workshops and direct contact with donkeys under supervision of our trained staff
- working with other organisations, groups, individuals, sanctuaries and agencies to promote the welfare and status of donkeys.

Why donkeys matter

Donkeys are often considered the invisible species: working in rural areas far from roads and infrastructure, usually for impoverished owners who depend on their donkeys for survival, for transport of people, goods, water and crops.

Donkeys play an important role in subsistence agriculture as they are willing, strong workers, easily managed by children or women.

With wealthier owners where they are kept as pets they are often maltreated in other ways: kept alone, overfed and neglected regarding stimulation. On some farms they run wild, breeding without control, and becoming problem animals as they roam and forage. Whether from ignorance, desperation or deliberate cruelty, donkeys often have a hard life. Our mission is to improve the status and welfare of donkeys.

Donkey and farm status

Our Donkeys

Even though it has been an *upside down world* for most of us, we have managed to keep the world mostly upright for our donkeys.

During the months of hard lockdown our donkeys felt the absence of visitors and they started showing signs of boredom by chewing and breaking poles and engaging in more vigorous play fight sessions. This is especially true for the younger, stronger main herd.

We have an 'Old Age Paddock' with our oldest donkeys living out their golden years in peace with special attention in their own field. Two smaller 'families' also live near them in their separate fields. Then there are two elderly donkeys who reside in the village of McGregor with the founders.

Donkeys lost and new donkeys

After many years of bringing us joy and teaching us much, we lost our dearest Bella and Valie: Bella due to old age and Valie due to a neurological condition.

Valie was one of our founder donkeys who brought the inspiration for the birth of Eseltjiesrus, creating a Sanctuary for donkeys in South Africa in 2007.

Bella was such a soft darling - with a bray that could be heard around the entire Breede Valley.

We know that they lived out their days being cared for and loved while being allowed to be who they are, just donkeys, free from worry, fear, stress, abuse and neglect. They and many others we have known and loved, are honoured at our memorial cairn at our Sanctuary.

Denise Strydom's donkeys came home to Eseltjiesrus. Note the interest from existing residents in the background. Friends of Denise raised funds via GivenGain to help to make this transition happen.

Currently our numbers stand at 28 donkeys on the farm and two donkeys living in the village of McGregor. A further three donkeys are in foster care in Franschhoek.

Good news and an example of how we support our friends is that we brought in a family of four donkeys from Barrydale in February this year. Denise Strydom passed away in February and before she died, she insisted that arrangements be made to get her beloved donkeys accommodated at our Sanctuary. Her family of donkeys have adjusted and are integrating into our environment.

Dental technician - As we do every year, we had a visit from our Dental Technician, Roann Bruyns. A lovely man who is infectiousy passionate about donkeys. We have found it necessary, for the time being, to change

our annual dental checks to semi-annual as we have been picking up on problem teeth in some of our younger donkeys more often than expected. We now re-check our donkeys and have regular visits scheduled.

Farrier - We are happy that we still have our excellent farrier of many years, Michael Mangali. We keep to a schedule of every eight to ten weeks for routine maintenance on the hooves.

Due to the daily cleaning of the hooves and treating thrush, the donkeys' hooves are in good condition. We continue to deal with the more serious condition of laminitis in some donkeys who arrived with this condition.

Deworming - Managing an effective de-worming programme is challenging. Strategic deworming of our donkeys and managing our environment in

Going to the dentist is never easy - here Oscar is getting attention in the middle of winter with our staff assisting.

Michael, our farrier, helping Lulu with her hooves. Many donkeys love this 'nail-salon' interaction. Proper hoof care is essential in maintaining the well-being of donkeys.

an eco-friendly way has become our option at Eseljiesrus.

This, for example, involves taking faecal samples from the donkeys and testing them for the amount and type of parasites, then deworming, or not deworming, according to the specific parasite burden. It is the first time that we are using this approach and it will result in a more effective parasite control plan.

This also shows how we are intensively taking daily care of the donkeys.

Veterinary care - As the saying goes, "An apple a day keeps the Doctor away" - We are confident that our thorough daily care routine is helping to keep our donkeys in good health by early detection of any ailments or injuries and treating them on the spot.

At times such issues are over our heads and beyond our immediate

skills set. Then we need to call in the professionals and we have a dedicated professional team on hand.

Feed - Ensuring that we plan ahead and procure enough feed for the winter season is one of our most urgent activities in the last months of summer. It is vital to build healthy relationships with stable suppliers who provide good quality, value for money feed yearly. We managed to procure our winter feed stocks during the last summer months and the bales are stored in our protected space on the farm.

Our feed stocks are looking good and we are confident that we will make it through to November, when the new cutting should start becoming available.

Developments - On site we recently built two new shelters to accommodate our increased number of donkeys. We are also extending some of our

The fresh air, scenic gardens and walks made the Visitor Centre, Donkey Shop and Coffee Shop very popular when open during Covid restrictions.

existing shelters to provide more protection to our donkeys from extreme weather conditions. We witnessed the improvement in donkey comfort during recent harsh winter conditions.

In addition, we continually monitor the Visitor Centre and the maintenance of the Sanctuary to provide a safe and pleasant experience for visitors.

Water - Sustainability of water sources is one of our key Risk and Opportunity management concerns with circumstances often out of our control.

Water is a constant long term concern for all of us living in this area. We are grateful that our boreholes did not

disappoint and kept us going until the rain finally came this year.

We had lovely rain, higher than the total annual rainfall of any of the last three years, up to date. This has significantly improved the underground water levels and we should not experience much difficulty getting through our next summer, the next dry season.

It remains important for us to consider building an additional dam to supplement our water reserve, to provide effective water management for the future.

Gretel resting with her friends nearby. An indication of a happy donkey.

Working beyond our fences

We respond to queries from all over South Africa on a daily basis, giving advice on donkey welfare. We have participated in a number of international webinars on donkey matters.

As part of our mission we assisted with the removal of a grossly obese, neglected donkey from a petting farm near Franschhoek. This donkey is currently in an excellent foster home together with two other fostered donkeys. They belong to our Sanctuary but having them in the foster home frees up space at our farm.

Promoting donkey welfare

A few days before the first lockdown in March 2020, we addressed the members of SA Association of Retired People in Cape Town and also had a

short zoom fundraising meeting with some donors.

In March 2020 the first Covid-19 lockdown started and we closed our doors to visitors. An intensive daily Facebook campaign commenced, featuring the different donkeys and keeping our adopters involved.

When lockdown was lifted and then later again re-instated, another Facebook campaign focussed on daily donkey care activities at the Sanctuary, reminding people that our work continues at all times.

During severe lockdown a weekly prime time interview slot for 13 weeks from June to August 2020 on the national radio station RSG served to

Books are also a donkey's best friend

All proceeds from our book sales go towards donkey care

raise awareness about donkeys and Eseltjiesrus country-wide.

Each of the four Grade R classes at Little Bosch School, feeder to Rondebosch Preparatory School, adopted a donkey at Eseltjiesrus. Every learner received a card with a picture of a donkey and fun facts. Some of the children bring their families to visit.

Personalised Valentine's & birthday cards serve to strengthen the relationship with adopters.

Resource Development

Fundraising initiatives continued during this period with renewed emphasis on bequests and funding.

The two "founder donkeys" Vaal and

Japie made an appearance at an organisation's Zoom meeting. We addressed the local Rotary Club per Zoom. A number of regional radio interviews occurred. Such events raise awareness and often result in donations.

A supporter cycled for Eseltjiesrus in the 2020 Cape Town Cycle tour and raised R13,300. We continue to engage via such fundraising efforts via the givengain.com portal.

The Climb4Hope event in Montagu listed the Sanctuary as one of its beneficiaries. We attended the prize giving ceremony and later received a magnificent donation of R25,000 from the organisers. This was used to build a much-needed shelter.

We held a continued period of book sales - promoted by social and local print media advertising which bought in an amount just short of R87,000 for the period March 2020 to 2021. This offset, to some degree, the money we normally raise with our well-known Book Fair - which was cancelled due to Covid. Thank you to all our supporters and publishers who donate so many excellent books.

We have a registered crowd funding page at GivenGain.com and intend to use this more effectively.

Our Donkey Shop sells unique items, many hand made by volunteers. We are expanding our range: already there are individual donkey fridge magnets, cards, soft toys and some beautiful artwork. More branded items are planned.

Visitors

Our visitors take our message of "A Culture of Caring" away with them and in effect promote our work to a wider audience.

In between periods of being closed due to lockdown regulations, our numbers of visitors remained positive. Small groups from churches, special interest clubs and service clubs visited. A film crew created footage that was shown on Voetspoor on SABC TV2.

Publications

Our quarterly newsletter 'Lang-Oor Nuus' is essential for keeping in touch

with supporters and interested donkey ambassadors.

A weekly staff bulletin called 'fluister' keeps all staff and volunteers up to date with activities.

We continue to produce brochures for adoptions, bequests, our farm implement display and Adam's Walk.

We value the support of Media24 who place, at no charge, several of our bespoke adverts in local community newspapers in the Breede Valley and Langeberg area. This helps raise interest and has led to many visits, adoptions and donations.

Donkeys for Africa (DfA)

www.donkeysforafrica.org

This project is independently funded by The Donkey Sanctuary (UK) and is an initiative run by Annemarie van Zijl. DfA has established contacts with numerous welfare organisations in 21 African countries.

Via donkeysforafrica.org we produce regular newsletters, establish connections and applaud achievements from donkey welfare organisations around Africa. We also provide a library of support material for donkey welfare practitioners on this website and social media related interaction.

DfA is an example of our continued outreach and our wider positive communication impact about donkey issues past our immediate fences.

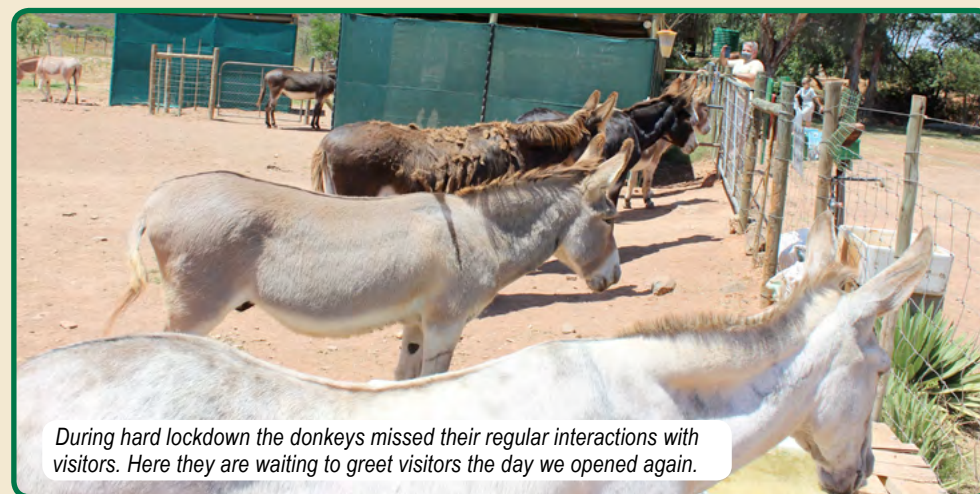

Our key stakeholders

We believe in building lasting relationships with all our stakeholders.

- **The Founders** maintain an active interest in ensuring that the Sanctuary's vision and mission are upheld.
- **Our Board** of volunteer members, with a wide spread of skills, who give freely of their time and expertise to ensure impeccable governance and wise guidance.
- **Management** form the link between staff and the Board and are accountable for the different areas of work.
- **Our Staff** maintain the highest standards in all areas of the Sanctuary's work, with a caring, supportive and learning work ethic.
- **Our consultants and suppliers** are chosen to assist us with prudent advice, best value and are sensitive about furthering the welfare of donkeys.
- **Regulatory and media engagement.** We educate, inform and engage about donkey welfare issues with government and all media portals.
- **We engage in local community** projects and are pro-active about the positive impact Eseltjiesrus can play in our local environment.

And of course:
THE DONKEYS!
"We undertake to care for every Sanctuary donkey until its last breath and never to turn away from any donkey in need."

During hard lockdown the donkeys missed their regular interactions with visitors. Here they are waiting to greet visitors the day we opened again.

Environmental, Social & Governance issues

Environmental

Key environmental concerns for the Sanctuary include:

- Water scarcity, a huge issue, where the focus is on managing our leiwater and borehole water and water saving initiatives.
- Energy efficiency, where we wish to move to solar to cut electricity costs and rid ourselves of load-shedding constraints.
- Waste management, where we have recycling initiatives in place and are working towards using only fully biodegradable/compostable products.

Social

Staff – the focus is on Health and Safety (including the Coronavirus pandemic), fair working conditions, equal opportunities, employee engagement, diversity, protection of human rights and personal privacy.

Visitors – here we are concerned for their health and safety (including Covid protocols) and the protection of personal privacy in terms of any data we might collect from individuals.

Community – where we aim to develop outreach initiatives within McGregor and beyond; extend our training for donkey carers and owners and engage with youth and schools in promoting a culture of caring.

Governance

Key to good governance is our overall structure:

- Our Members who through the Annual General Meetings hold us true to our constitution which is the ultimate authority for all activities of the Sanctuary.
- Our Board, appointed by the Members at the AGM, have a Board Charter (a comprehensive terms of reference that go beyond the Constitution); hold regular meetings and a non-executive majority is required for all decisions and quorums.
- Our Board Committees – these are appointed by the Board to focus on various aspects of our work. Each has a comprehensive set of terms of reference with clearly defined responsibilities. They comprise a mix of non-executive and executive members and meet regularly. The committees are Audit and Risk; Communication and Resource Development; Human Resources; Board Advisory; and Chairperson's Fund.
- Our Executive Committee members are appointed by the Board and are responsible for the day-to-day management of the Sanctuary and all its activities. They also have a comprehensive set of terms of reference with clearly defined responsibilities.

Donkeys get groomed and cared for every day. Here Chriswill Jordaan checks Mindy's eyes.

Risks and opportunities management

The Executive Committee works with the Board's Audit and Risk Committee to manage a variety of risks and opportunities that could affect our operations.

Our top three risks currently are:

- The Sanctuary might run out of water for irrigation and water for donkeys and humans. We are managing this risk by looking at the possibility of building a new dam and also ensuring that we have plans in place for emergency supplies of water during prolonged drought periods.
- The possibility of workforce illness due to Covid 19. The importance of ensuring donkey care and welfare seven days a week makes it essential to monitor staff health on a daily basis and ensure that the recognised Covid protocols are followed fully. We are encouraging staff to get vaccinated as soon as possible to lower this risk.
- Drought conditions might put pressure on feed supplies and lead to higher

cost and less availability of feed. Although currently we have adequate supplies of feed, this is an annual risk that has to be monitored and actions taken early to ensure a pipeline of feed supplies.

Strategic priorities include:

- Develop the farm to home up to 40 donkeys. This includes the planning for a dedicated feed store, dam, additional paddock and a multi-purpose building.
- Investigate sustainable practices on the farm which include environmentally friendly conservation, recycling, off-the grid electricity supply, greening and water supply and purification.
- Develop and expand Donkey Care and Welfare beyond the fences. This could include the appointment of a voluntary Donkey Welfare Officer.
- Maintain and develop new forms of public relations styled funding through our website, Facebook and other types of social media.

Financial Review for the year ended 28 February 2021

We are well into the second year of varying levels of lock-down. It is becoming clear that certain restrictions will affect our lives for some time to come. Thanks to the loyal support of our adopters, donors and Donkey Ambassadors, we have weathered the Covid storms better than we anticipated. The stringent financial and other controls implemented have borne fruit. Our staff remain loyal and healthy, the Sanctuary property remains viable and our work to improve the welfare of donkeys remains effective.

The Sanctuary received another clean audit report for the financial year ending 28 February 2021. The net worth of the organisation is currently R3,6 million.

Both our income and expenditure figures for the 2021 year were down slightly compared to the previous year due to the Covid pandemic and the fact that we were closed to visitors for five of the 12 months in the year.

On the income side we were unable to hold our annual Book Fair which normally brings in around R170,000. We nevertheless achieved around R87,000 in book sales during the financial year. Adoptions raised were 26% higher than the previous year: a tremendous show of support for our work from our supporters and which accounted for 60% of our income.

Donations and grants raised a further 22% whilst bequests brought in 5%. Trading from the coffee shop and the donkey shop gave us another 10%.

Overall expenditure was 9% down on the previous year due mainly to tight financial controls. The funds spent on direct donkey related aspects of our work came to 59% of our expenditure. Administration was 20% and trading 9%. Interest on our outstanding bank loans cost us 1% and publicity and fundraising 4%. The full Annual Financial Statements are available on our website or from admin@donkeysanctuary.co.za

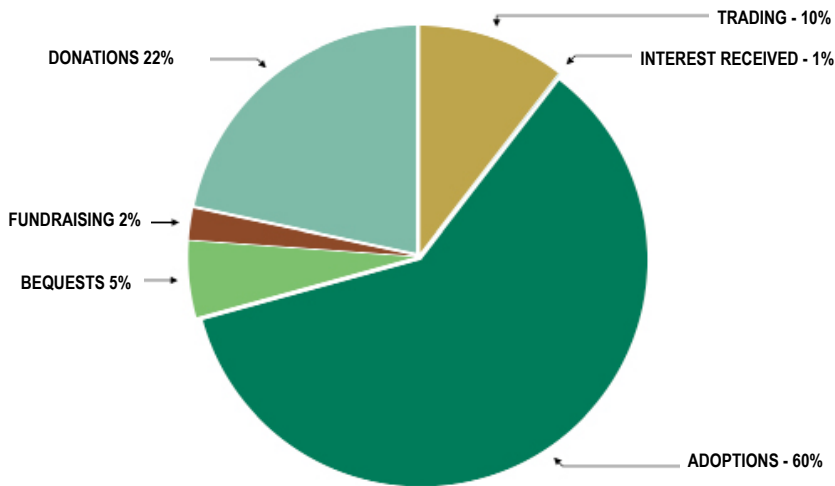

Needs and budgets

Each year the Board sets a three-year budget for our work. The current year's expenditure budget is just under R3.6 million and the anticipated income is just over R3.6 million. Our budget covers our operational work.

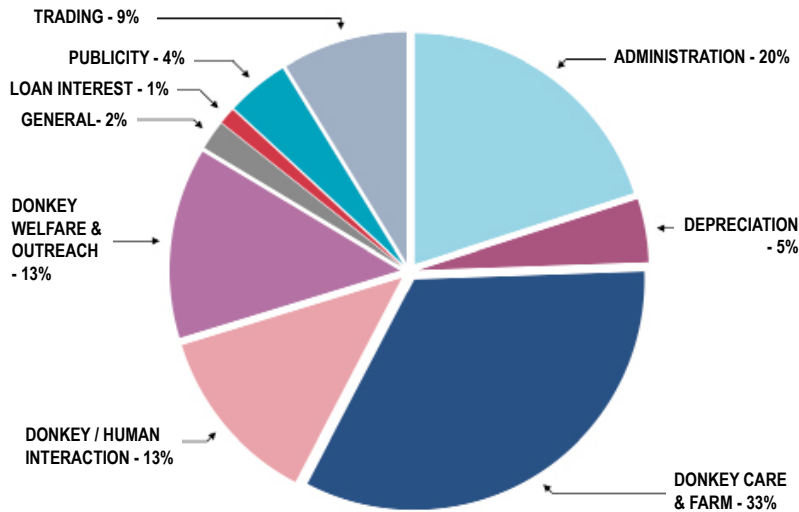

However, we require funding for:

- further shelters for the donkeys
- development of an additional paddock
- conversion to solar for the farm
- replacement of one of our vehicles
- a new multi-purpose building which will allow more activities to take place at the Sanctuary as well as providing better workshops and storage.
- increased outreach ability to promote donkey welfare.

How you can help donkeys

Become a Donkey Ambassador

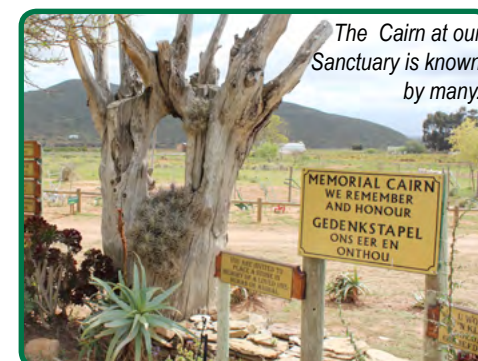

Understand the charm and needs of these humble animals and enhance their status in your interactions with family, friends and others.

Visit our Sanctuary to experience the magic of quiet interaction with a donkey. Each one has its own personality and your eyes will be opened to their unique characteristics. Look deep into an elderly donkey's eyes and see there humility, knowledge of suffering and appreciation of better days.

List Eseltjiesrus as a beneficiary on your MyPlanet card, support our Donkey Shop, Coffee Shop and our book sales. Support our work by adopting a donkey for yourself or as a gift for a loved one, or make a donation.

Bequests are a way to ensure the lasting future of our Sanctuary.

Any level of support is welcomed and all are treated with equal respect.

The Cairn at our Sanctuary is known by many.

Our donkeys love our people and our people love the donkeys.

Donkeys have regular water cooler interactions - just like in corporate offices around the world...

Donkeys love meeting visitors. They are gentle, loving and funny animals.
